

DIVAKAR S

FULL STACK DEVELOPER

[linkedin.com/in/divakar023](https://www.linkedin.com/in/divakar023) | github.com/DivakarDiva

SUMMARY

Full Stack Developer focused on building responsive web applications and practical backend systems. Hands-on with React, JavaScript, Node.js, Express.js, REST APIs, MySQL, and MongoDB, with project experience covering CRUD applications, URL shortening, expense tracking, and API-driven web applications.

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, React
Backend	Node.js, Express.js, REST APIs, Authentication, Authorization
Databases	MySQL, MongoDB
Tools	Git, GitHub, VS Code, Linux
Concepts	CRUD Operations, API Integration, Database Connectivity, Responsive Web Development

PROJECTS

AI-Based Network Intrusion Detection System

Developed a project focused on monitoring network traffic and identifying suspicious activity through traffic features and analytical models.

Technologies / Focus: Network traffic monitoring | Attack detection | Traffic-feature analysis | Machine-learning-based analysis

Weather App

Built a responsive weather application that consumes an external API and presents dynamic weather information through a clean user interface.

Technologies / Focus: React | JavaScript | API integration | Responsive UI | Dynamic data

URL Shortener

Developed a full-stack URL shortening application with short URL generation, database storage, and click-tracking functionality.

Technologies / Focus: React | Node.js | Express.js | MongoDB | REST API

Expense Tracker

Created an expense-management application supporting adding, editing, deleting, categorizing, and reviewing expenses with total calculations.

Technologies / Focus: JavaScript / React | CRUD operations | Expense history | Categorization

CRUD Operations Website

Built CRUD functionality for creating, reading, updating, and deleting records while working with both relational and NoSQL databases.

Technologies / Focus: Node.js | Express.js | MySQL | MongoDB | REST APIs

LEARNING JOURNEY

Frontend Development → React Development → Backend Development → Database Development → Full Stack Projects → Practice & Problem Solving

CURRENT FOCUS

Full Stack Development • React • Node.js & Express • MySQL & MongoDB • REST APIs • Responsive Web Applications
